8000-TON PRESS IN OPERATION

This huge 8000 ton hydraulic extrusion press is now in full production at Harvey Aluminum, Torrance, producing aluminum alloy extrusions for aircraft and missile structural components. The press is the first to be operated in the West under the Air Force Heavy Press Program. Overall length of the press is 288 feet, and it weighs 4,000,000 pounds.

8000-Ton Press Starts Production At Harvey

An 8000 ton extrusion press—the first big press to be operated in the West under the Air Force Heavy Press Program—is now in full production at Harvey Aluminum, Torrance.

Capable of exerting a pressure of 8100 tons, the hydraulic press produces large high-strength aluminum alloy shapes for military, defense and commercial needs.

These one-piece structural shapes supplant conventional fabricating methods of joining many smaller components, thereby offering substantial weight and cost reductions to airframe and missile makers.

New supporting equipment in operation at the fully integrated, self-contained Harvey plant includes electric ingot casting facilities, homogenizing furnaces, electric induction re-heaters, 110 foot vertical heat treat furnaces, and two large stretch

straighteners of 1,500,000 and 3,000,000 pounds capacity.

Weights 4 Million Pounds

The 8000 ton press has an overall length of 288 feet and weighs 4,000,000 pounds. A companion 12,000 ton extrusion press, the largest ever built in this country, is also being assembled at the Torrance works. The operation of this press will complete the government's heavy press program.

Overall cost of the Air Force Heavy Press Program is estimated at \$279 million, including presses, facilities, and supporting costs, such as transportation and industry expansion.

Harvey Aluminum was the only industrial participant in the program to privately finance the construction of its heavy press buildings.

High strength aluminum alloy extrusions from the Loewy Hydropress designed 8000 ton press are being used for large wing, fuselage and structural aircraft and guided missile components.

The extrusion process is a metal working operation where by solid cast billets or ingots are heated to a plastic state confined within a cylinder, and forced to flow under pressure through openings in a die. The shape of the extrusion conforms to the configuration of the die openings.

Pioneer Resident Succumbs

One of the pioneer residents of this area, C. F. Fiesel, who, together with his family, lived at 1442 West Carson street until July of this year, died at the home of his daughter October 20.

Funeral arrangements were to be held yesterday at Halverson-Leavell mortuary, with burial scheduled at the Wilmington cemetery.

Fiesel was born in Germany July 27, 1867. At the age of 23 he immigrated to the United States, settling in Chicago.

He lived there three years, marrying Anna Marie Houck. From there the family moved to Wilmington where Fiesel went into farming. He farmed in the area between Wilmington and Torrance until 1929 when he retired.

The Fiesels had 11 children in all. Mrs. Anna Marie Fiesel died in 1923.

Fiesel married Martha Klemfuss in 1929. They lived at the Carson street address until July of this year when he suffered a severe heart attack and was hospitalized for two weeks. He stayed with his daughter, Dr. Esther Townsend of Los Angeles.

Fiesel is survived by his wife, Martha; five sons, Fred B., Henry, William, John and Carl. He also leaves four daughters, Anna Maria Shepherd, Dr. Esther Townsend, Lucy Brimer, and Mary Liles; 14 grandchildren and 13 great-grandchildren, all of them living in the Harbor area.

Youth Found Dead In Pool

A 21-year-old youth died Thursday, apparently from drowning, according to Torrance police.

Dead is Gregory Carey, jr., a Columbia-Geneva Steel co. employe. Carey was pronounced dead on arrival at Harbor General hospital after he was discovered in the pool of the Hollywood Riviera Beach club by employes.

He had apparently been swimming alone before being discovered, according to police. Club officials said he had not been given permission to enter the pool without supervision.

Attempts by county life guard teams to revive him failed. Carey is the son of Mr. and Mrs. Edward Epstein, 150 East 223rd street, Wilmington.

Funeral services were scheduled for Monday, October 22.

Services Slated For Walt Morris

Funeral services for Walt Morris, 64, who lived in Lomita over 30 years, will be held today, Thursday, October 25, at the Munow Funeral home, 44663 Date avenue, Lancaster, at 2 p.m.

Morris died Friday of a cerebral hemorrhage in Lancaster. He was active locally, organizing baseball teams for youngsters and adults alike. He, himself, at one time played pro baseball with the White Sox and Indians.

He was born May 4, 1898 in Redding, California. He is survived by his wife, Orpha; a daughter, Virginia M. Hibbs of 25813 Narbonne avenue, Lomita, and a son, Walter E. Morris Jr., of Lancaster. A brother, Bernard Morris, lives in Wilmington.

If you want classified results call FA. 8-2345.

DAV To Meet

Disabled American Veterans, Chapter No. 92 of Torrance, will meet Friday, October 26, at 8 p.m. at the local YMCA, 2080 Washington street.
